

Note: Fill the environment variables in .env file before running the code

DOCUMENTATION

Refer to the the README.md in the repository, here is the link for the same:
<https://github.com/Sreyas-J/ZenseProject/#readme>

MOTIVATION

I worked on this project because collaboration and learning should transcend physical barriers. Having faced the challenges of remote teamwork and online education myself, I understand the struggle of juggling disjointed tools. This project empowers individuals like me to collaborate seamlessly and learn effectively.

Sreyas zense trialUser

The screenshot shows the application's main interface with two groups, B234 and B234. Each group has three main sections: Documents, Recording, and Members. The Documents section contains a single file named 'b234file'. The Recording section lists several video files. The Members section lists users: 'zense' and 'dennis' for the first group, and 'Sreyas', 'zense', and 'trialUser' for the second group. A modal window for a 'VideoCall' is overlaid on the second group's interface, containing fields for 'Group name' (empty), 'Access' (set to 'All members'), and 'Group icon' (choose file, no file chosen). There are also 'Create Document' and 'Add Member' buttons.

Group name:

Access: All members

Group icon: Choose file No file chosen

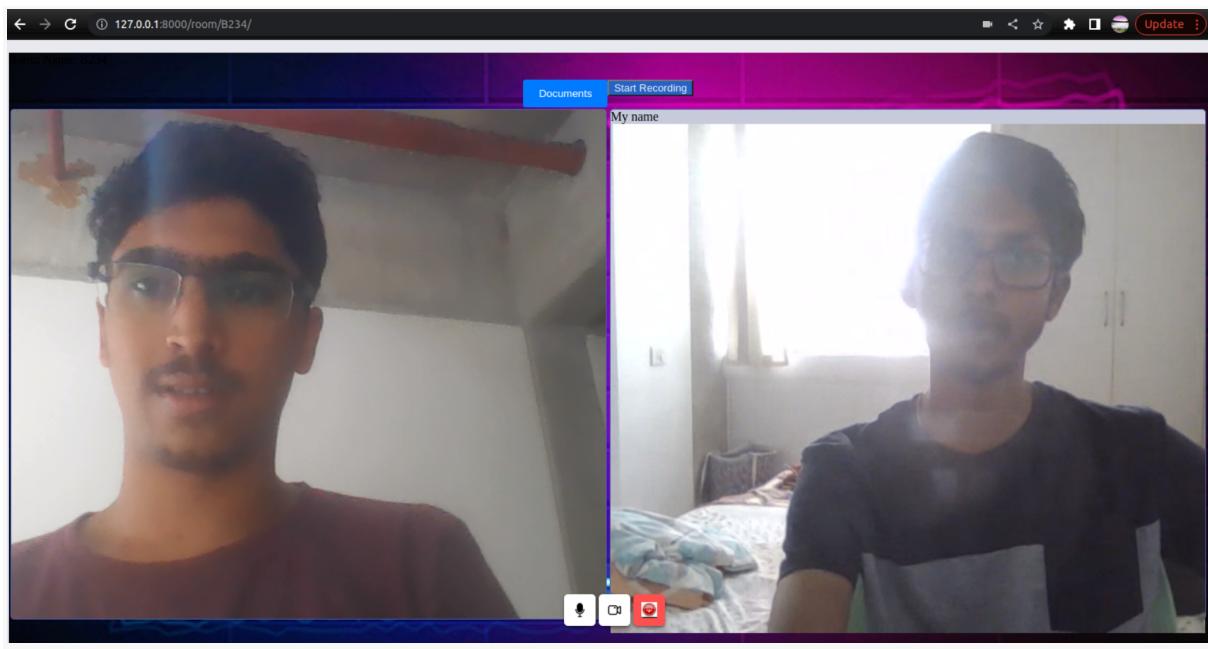

Create Group

This screenshot shows the 'CREATE GROUP' form. It features a 'Group name' input field, an 'Access' dropdown set to 'All members', and a 'Group icon' file selection field which currently shows 'No file chosen'. A 'Create Group' button is located at the bottom of the form.
